

# School Bus Safety

By: \_\_\_\_\_

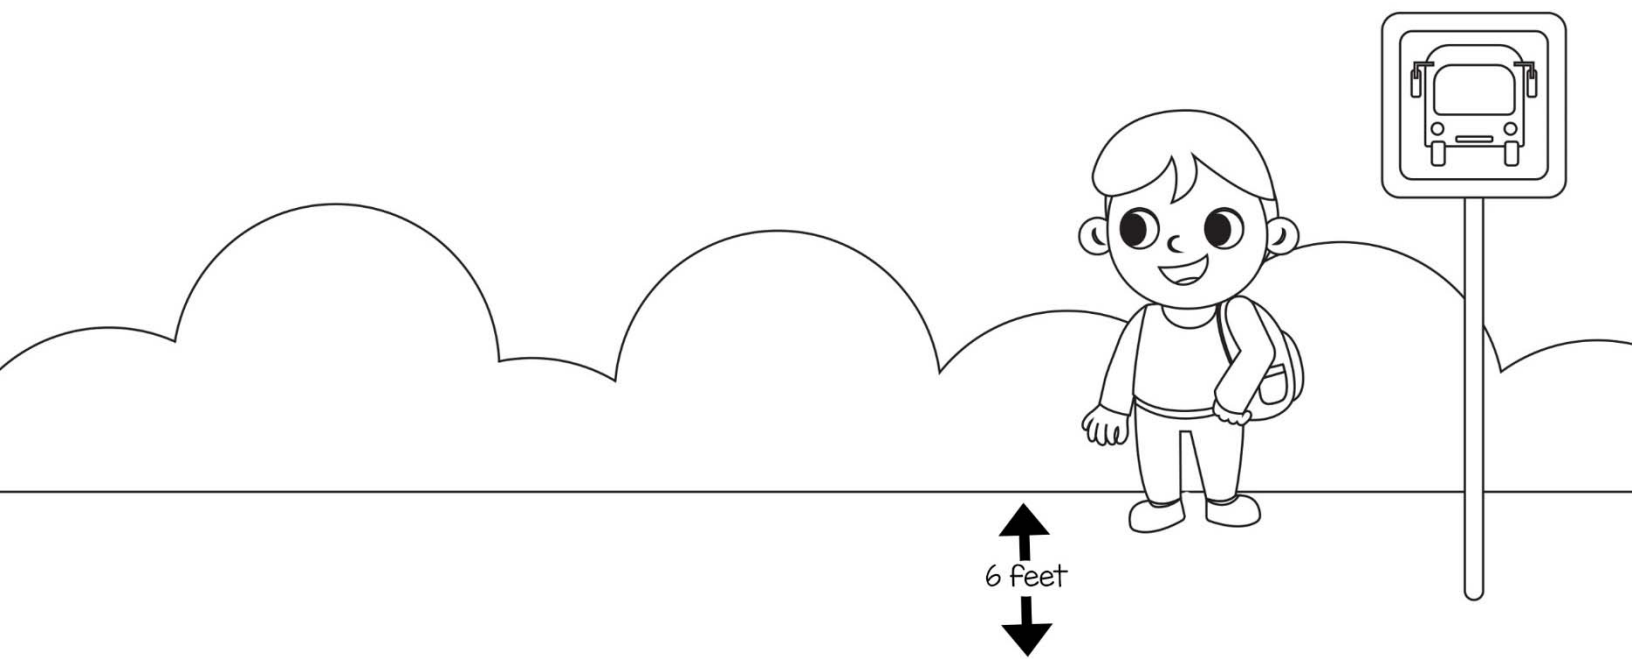

I should arrive at least 5 minutes before  
the bus is scheduled to arrive.

On the way to the bus stop, I will walk and not run.

1

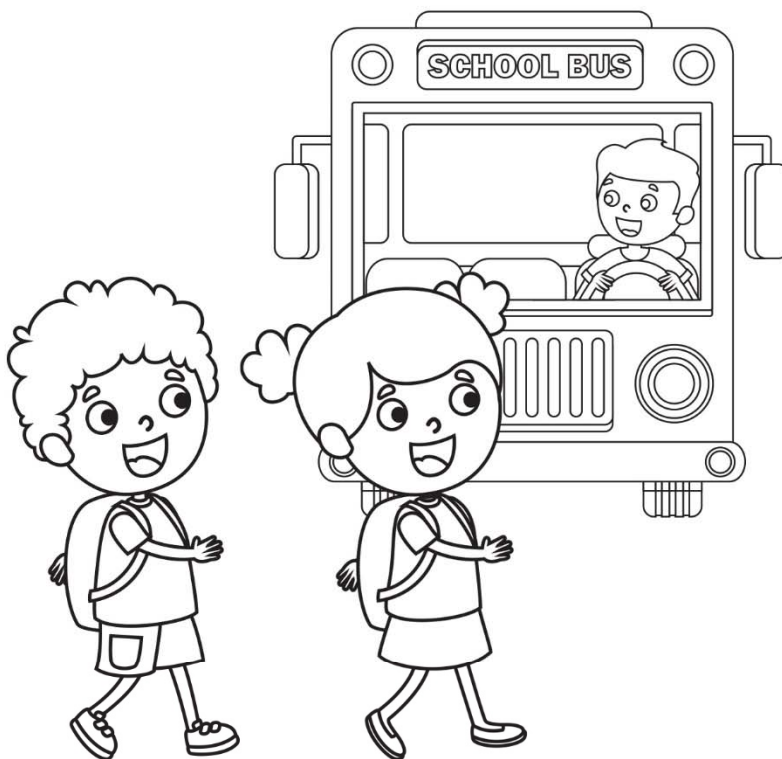

At the bus stop, I will take three giant steps  
(six feet) away from the curb.

3

I should wait to board the bus until the bus comes to a complete stop and the driver opens the doors.

4

When crossing the street to get on or off the bus, always cross 10 steps in front of the bus after making eye contact with the bus driver.

6

X

✓

I should never walk behind a school bus.

5

Do not bend over to pick up an item in front of the bus without the driver telling you it is safe to do so first.

7

While riding on the bus, you should  
sit and face the front.

## This book was created by LifeNet, Inc. in memory of Hannah Martin.

Seven year old Hannah Martin was known for her love of dance and her infectious smile. That all changed on a dark early fall morning in 2012.

As Hannah was waiting to be picked up by the school bus, tragedy struck. She was killed when the bus accidentally ran her over at the bus stop. The early morning darkness is one of the factors that is believed to have caused the tragic accident.

LifeNet responded to the scene. Paramedic Bobby King wanted to do something to help prevent another tragedy like Hannah's from occurring and came up with the idea to provide flashing lights for kids to wear on their backpacks while waiting for the school bus.

The lights are known as "Hannah's Light" in memory of this precious little girl and distributed to kids in Hot Spring and Garland Counties in Arkansas. The lights are funded through donations and fundraisers. If you'd like to donate, visit [www.LifeNetEMS.org/Hannah](http://www.LifeNetEMS.org/Hannah).

10

On a bus, you should speak quietly,  
so the driver will not be distracted.
